

Back to the Garden

It's Time to Get Back

For a while, people strayed so far, they thought it was okay to put chemicals on their skin. But our skin is a glowing reflection of body, mind, & spirit and deserves to be treated with respect.

At Badger, we know that when we take pure organic oils, butters, and herbal essences of flower, leaf, and root, and process them naturally – blend them carefully at low temperatures and apply to our skin – good things happen.

Badger's simple, powerfully pure, chemical-free body moisturizers comfort the body - soothe, smoothe, and protect the skin.

Revel in the sensual fragrance, and enjoy the beauty that comes from the inside out. Much of this is courtesy of the profoundly soothing powers of traditionally processed, cold-pressed Virgin Cocoa Butter, Virgin Coconut Oil and unrefined Shea Butter.

Beautify and moisturize naturally – And get back to the garden!

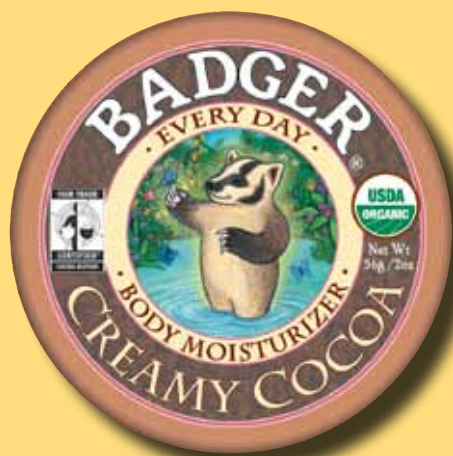

Coming
in April!

BADGER®

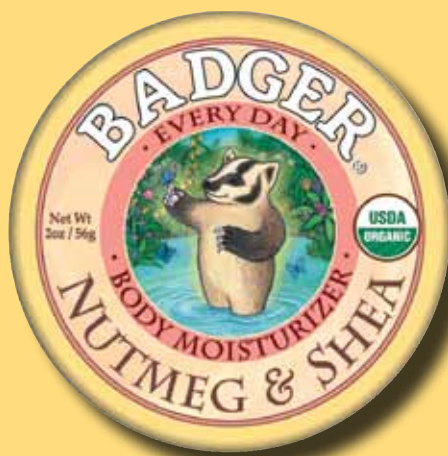

EVERY DAY BODY MOISTURIZERS

Our fabulously pure Cocoa Butter, Coconut Oil, and Shea Butter are mixed with extra virgin Olive Oil, Beeswax and Caster Bean Oil. This blend creates a fine consistency and texture and acts as a powerful emollient to give lasting moisturizing power. Added to this is Rosemary CO₂ extract and other amazing oils, butters and natural plant based antioxidants.

CREAMY COCOA
Every Day Body Moisturizer

Cocoa Butter is an ancient crop that not only makes yummy chocolate, it is also deliciously rich and creamy skin soother and moisturizer, used as a dry skin healer for generations. The traditional cold-pressed process used to make our cocoa butter allows it to retain its beneficial and healthful properties; cocoa butter is naturally high in emollients and antioxidants. Added to this Cocoa blend are two other fantastic skin-soothing oils – coconut and jojoba.

NUTMEG & SHEA
Every Day Body Moisturizer

Badger uses unrefined Shea Butter from the seed of the wild-grown Karite Tree of East Africa. It is thought to be a “youth enhancer”, and has been treasured and revered for centuries as an extremely effective skin soother, moisturizer and beautifier. We add to this Nutmeg CO₂ Butter and Nutmeg CO₂ essential oil. Both stimulate circulation, counter dryness, and share an aromatic, warm, familiar scent.

VANILLA COCONUT
Every Day Body Moisturizer

The Coconut tree grows in regions close to the ocean, with fruits that are able to withstand heat up to 120 degrees while remaining fresh, stable and healthful. Badger purchases coconut oil from non-profit women’s cooperatives located in small villages in Fiji. There the coconut oil is traditionally processed within one hour of harvest, effectively locking in the aroma “volatiles” which create a scent reminiscent of macarons in the oven – simply luscious! Added to this is the sweet aroma of vanilla CO₂ extract that comforts and gently soothes the skin.
