## ABOUT US

At Sukin Organics, we believe the most powerful and effective ingredients for your skin and hair care come from nature.

In 2007, we combined our commitment to affordable natural skin and hair care with our commitment to the environment and created a brand with a message that extends far more than cosmetic.

Produced and manufactured in Australia and managed by a small family company, Sukin Organics has fast become one of Australia's leading natural skin and hair care brands.

## SUSTAINABILITY

### **CARBON NEUTRAL**

As a young company we value the importance of not only affordability but sustainability. We have made an on-going commitment to off-set unavoidable carbon emissions by purchasing carbon credits that go towards a land fill project. What this means, is that our production, distribution, marketing and selling of Sukin products, air and sea freight, travel, fuel costs and electricity and natural gas usage are all deemed carbon neutral.

### **RECYCLABLE PACKAGING**

All products are packaged in environmentally friendly recyclable packaging.

### **NO ANIMAL TESTING / VEGAN**

We do not test our products or product ingredients on animals. We do not use ingredients derived from animals in our products. We use happy human volunteers instead.

### **WHAT TO LOOK FOR**

- Complete disclosure of ingredients
- Skin friendly compatibility free from skin irritants such as sodium lauryl sulphate, sodium laureth sulphate, synthetic fragrances, animal derivatives, harsh detergents, petro-chemicals, artificial colours, triethanolamine, mineral oils and parabens.
- No animal testing

## OUR PRODUCTS

Each product combines high concentrations of active Australian botanicals and 100% essential oils used at generous levels known to be beneficial to the skin.

As it is difficult to predict the long term effects chemicals typically found in skincare may have on the environment, Sukin chooses to stand apart from the synthetic majority and has eliminated sodium lauryl sulphate, sodium laureth sulphate, synthetic fragrances, animal derivatives, harsh detergents, petro-chemicals, artificial colours, triethanolamine, mineral oils and parabens.

Without compromising on quality, we have kept our retail prices below the market average ensuring everyone has access to quality, natural skin and hair care.

## THE SUKIN DIFFERENCE

A commitment to creating natural skin care products starts with a clear checklist on what skin and hair care products should NOT contain.

### **NO PARABENS**

What we use instead;

We use natural preservatives such as Citrus Paradisi (grapefruit seed extract) wherever possible, however to maintain a substantially longer shelf life (2years on all Sukin products) we also use Phenoxyethanol at very safe & low levels as it has a proven safety record.

## **NO ARTIFICIAL COLOURS**

What we use instead;

The colour of Sukin formulations is due to the natural and organic ingredients used to create these. No artificial colours are added. As essential oils and their particular yield can vary from batch to batch, so too can the colour of our products. This is perfectly natural.

## **NO PETRO-CHEMICALS / NO TRIETHANOLAMINE**

What we use instead;

With many natural emulsifiers available to replace these harsh ingredients, we use plant and vegetable derived surfactants, vegetable oils and vegetable based glycerin instead.

## **NO MINERAL OILS**

What we use instead;

We use natural plant and seed based oils for their wonderful moisturizing properties. Some commonly used oils that you will see in our products are certified organic rose hip, jojoba, avocado and wheat germ oil.

## **NO SLS/SLES**

What we use instead;

We use coconut derived, non-drying ingredients such as Decyl Glucoside & Cocamidopropyl Betaine in our hair & skin cleansing products to effectively remove surface oil, dirt & bacteria without stripping the skin's natural oils.

## **NO SYNTHETIC FRAGRANCES**

What we use instead;

We use Australian essential oils such as tangerine, mandarin and lavender, blended with vanilla extract to give you the all-natural signature Sukin fragrance that we are sure you'll agree is simply delicious!

## **NO ANIMAL DERIVATIVES**

What we use instead;

As a proud vegan brand, we don't use animal products or even by-products such as honey, lanolin or beeswax. Instead, Sukin boasts soy proteins and natural plant extracts such as shea butter and jojoba as emollients to soften, soothe and hydrate the skin.
